

WOVEN ESPECIALLY
FOR THE CHEF

NEW HIGH-PERFORMANCE FABRIC

cheftexTM
.....

chEftEX™

Our new high performance poly-cotton outperforms the competition where it counts most:

quick drying

Chef-tex is comprised of nano fibers that are 1/100th the size of a human hair. This fabric helps absorb the moisture, spreading it quickly throughout the fibers to enhance the drying time. It has a drying rate 33% faster than the competition. This keeps the user cool and comfortable in heated environments.

easy stain release

Chef-tex is able to handle the toughest of kitchen stains that are normally very difficult to get out. This is due to a patented process directly applied to the fiber, which also prevents spreading and re-disposition in the wash. This is not a topical additive, which typically can wash off; this fabric's stain release performs for the life of the garment.

lasting color retention

Chef-tex holds its color through the life cycle of the product, even in whites, which leads to increased Return On Investment for the end user due to this advanced durability. Our "Deep Dye" technology resists fading from sunlight, washings and oxidation.

superior shape retention (wrinkle resistant)

Chef-tex continues to outperform the industry by offering superior "shape retention" in garments produced from the fabric. This fabric holds its form better and longer than comparable products made with other fabrics, leading to a crisper garment and longer life cycle. Wrinkle resistance is an inherent attribute of the fabric.

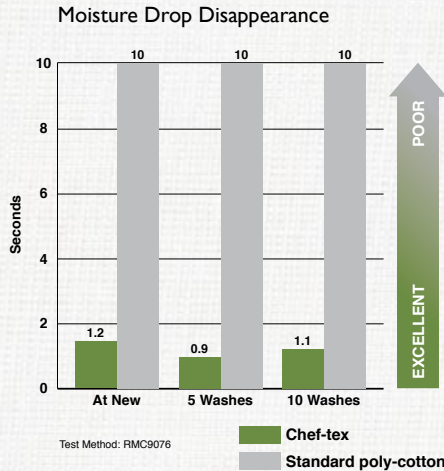

ultimate comfort

Chef-tex's smooth and luxurious feel is the result of a patented technology that has been engineered for high performance characteristics by private labs. In addition, the softness is permanent and consistent, even after multiple washings.

When you experience Chef-tex's visual appeal, moisture absorption and wrinkle resistance with the

The proof is woven in.

quick drying

Chef-tex wicks moisture faster than standard poly-cotton – wash after wash.

lasting color retention

After 25 washings Chef-tex retains its bright, clean color while other standard poly-cotton fabrics fade, discolor and lose their brilliance.
